

User Defined Mailing List

PROGRAM NAME: CMASTLBL
MENU OPTION TITLE: User Defined Mailing List
MAIN MODULE: INTERNAL MAILING LIST
HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program is true proof of what a database system can provide in data retrieval. You can define the output of mailing labels by setting the parameters according to your needs. This will allow you to target a mailing campaign of, when, where, and to whom you want. Anything else? The mailing labels are the same universal labels used for all other label printing functions in the IBS software systems. NOTE: In {CMMMAINT} is the field MAIL LABELS (Y/N): that flags by customer whether or not to print a label for this customer when performing a global mailing label printing function. The field PRINT ALL CUSTOMERS (Y/N):, in this program will override that field in {CMMMAINT}.

PROGRAM OPERATION

ENTER STATE TO PRINT:

ENTER ZIP CODE TO PRINT:

ENTER GROUP CODE TO PRINT:

ENTER REP CODE TO PRINT:

PRINT YTD SHIP \$ GREATER THAN:

PRINT YTD SHIP \$ LESS THAN:

PRINT ALL CUSTOMERS (Y/N):

ENTER ACCOUNT TYPE TO PRINT:

<L>ICENSE, <N>ONLICENSE, <A>LL?
