

Print SE# Books by Sold Date

PROGRAM NAME: FEDPRNT3

MENU OPTION TITLE: Print SE# Books by Sold Date

MAIN MODULE: SERIAL# REPORTS

HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program generates a printed chronological report within a specific serial number book based on sold date. You can select from the valid serial number books, and then select between a beginning and ending range of sold/ship dates. The report includes: Manufacture, model, serial #, Model/Description, caliber, received information and sold/ship to information. This database is an independent file that is required for compliance with BATF regulations. The report pulls information from the database "FEDBOOK.DAT" only and will need condensed print because of the detail.

PROGRAM OPERATION

ENTER THE SE# BK YOU WISH TO PRINT FROM:

ENTER THE EARLIEST SHIP DATE:

ENTER THE LATEST SHIP DATE:

IS THE ABOVE INFORMATION CORRECT (Y/N)? <Y>
