Print SE# Books by Acq. Date

PROGRAM NAME: FEDPRNT5
MENU OPTION TITLE: Print SE# Books by Acq. Date
MAIN MODULE: SERIAL# REPORTS
HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program generates a printed chronological report of all entries within a specific serial number book based on acquisition date. You can select from the valid serial number books, and then select between a beginning and ending range of acquisition dates. The report includes: Manufacture, model, serial #, Model/Description, caliber, received information and sold/ship to information. This database is an independent file that is required for compliance with BATF regulations. The report pulls information from the database {FEDBOOK.DAT} only, and will need condensed print because of the detail.

PROGRAM OPERATION

SELECT THE SE# BK YOU WISH TO PRINT FROM:

ENTER THE BEGINNING ACQUISITION DATE:

ENTER THE ENDING ACQUISATION DATE:

NUMBER OF RECOREDS BEING OUTPUT:

IS THIS INFORMATION CORRECT: <Y>
