

Change Group Code

PROGRAM NAME: FOCHGGRP
MENU OPTION TITLE: Change Group Code
MAIN MODULE: MRP
HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

You can use this program to change the group code in the manufacturing forecast. You can use the <PageUp> or <PageDown> keys to find the part you need to work with. You can also type in as close as possible and use the tab key to find the part.

PROGRAM OPERATION

PART #: You must make an entry here for a valid part in the production forecast. You cannot return past this field.

DESCRIPTION: This will display automatically when a valid part is entered.

PARTS GROUP CODE: This will display automatically when a valid part is entered and is the group code from the part master file.

CURRENT GROUP CODE: This will display automatically when a valid part is entered and is the current group code that is stored in the manufacturing forecast.

NEW GROUP CODE: You can type in a new group code that you want the part to have. This program does not check to make sure this new group code is valid in the inventory part group code file. So, make sure you are entering a valid code.

IS THIS CORRECT <Y/N>? You can hit no and the screen will clear, or you can also escape to do the same. If you answer "Y", the program will make the changes.
