

## **Print Parts Breakdown w/Detail**

**PROGRAM NAME:** FOPRT2

**MENU OPTION TITLE:** Print Parts Breakdown w/Detail

**MAIN MODULE:** MRP

**HELP KEY ACTIVE:** NO

### **PROGRAM OVERVIEW**

This report will assist you in working within the MRP system, and is intended to illustrate the breakdown of all inventories in the system. You will get a listing of all raw materials from the inventory master file, any subassemblies in stock, and any work orders in process. For finished goods, you will get the detail for finished parts in inventory, from subassemblies in stock, and from work orders in process. You will also get a listing of the raw, wip, finished, on order, and assigned from the part master file. The final field printed is the net stock of each inventory item, which is the finished quantity plus on order, minus the assigned field. Remember, the assigned field will consist of needs from both unshipped orders and back orders, and needs from work orders.

### **PROGRAM OPERATION**

**Include Expected Delivery Dates On Report <Y/N>?** You can choose to print the delivery dates and quantities of both scheduled purchases and work orders, for all on order. Remember, on order includes both purchase orders and work orders.

**Press RETURN to begin or ESC to exit**

**Printing, Please wait ...**
