

Reprint Parts Needs/No Calc

PROGRAM NAME: FOREQSEL

MENU OPTION TITLE: Reprint Parts Needs/No Calc

MAIN MODULE: MANUFACTURING MRP

HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

(What goes here?)

NOTE: This program is totally dependent upon the last time {FOREQMAN} was run. Be very careful to insure that you are looking at current information.

PROGRAM OPERATION

Press RETURN to begin, ESC to abort

If the work file is in use, the screen will say "**Please try again later. Press RETURN**". A second error will appear at the bottom of the screen that says, "**REPORT WORK FILE IS BEING USED ELSEWHERE <<STATUS 300>> #48**".

(Does anything belong after this?)
