

Print 52 Week Production Plan

PROGRAM NAME: FOYEAR2

MENU OPTION TITLE: Print 52 Week Production Plan

MAIN MODULE: MRP

HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program generates a 52 week report per part in a spreadsheet layout, with data from the Master Production Schedule, the Master Sales Forecast, the master inventory file, and the sales system.

Each part will start with the beginning inventory on hand, and subtract unshipped orders, subtract sales forecasted, add the master production plan, and come up with a net inventory balance at the end of each week. This allows you to look at you inventory balances at the end of each week.

PROGRAM OPERATION

BEGINNING DATE FOR REPORT :

ENDING DATE FOR REPORT : The system will automatically load the first of the month the computer system has for the current date and the final week of the 52 week plan. You cannot change these dates, Keep in mind the MRP system is based on a perpetual year theory, meaning that you should consider all time beyond the current time future data. You must manage your Master Sales Forecast and Master Production Schedule with this in mind.

ENTER REPORT GROUP CODE or BLANK FOR ALL: You can print only the parts per a certain group code.

PRESS RETURN TO START REPORT:

WORKING, PLEASE WAIT ... You can hit the escape key to stop the report. The parts that are being printed will display on screen.
