

Enter/Edit Inv Group Codes

PROGRAM NAME: INPRTGRP

MENU OPTION TITLE: Enter/Edit Inv Group Codes

MAIN MODULE: PARTS MAINTENANCE MENU #1

HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

Use this program to create and edit part grouping codes and customer media type codes.

Group codes are used to segregate inventory items into larger groups other than by a range of "Part Number" or by "Vendor ID". This will prove useful in running a report to track inventory activity by way of "groups". You can also globally change existing codes with the program {INCHGGRP}.

This is an indexed field in the programs {INPRTGUT} and {CMMMAINT}. See those program documents for details on how to enter the codes into those programs.

Media codes are used to indicate, on a mailing label, what type of media should be packaged in their mailer. The media code will be printed in the upper right corner of the mailing label to assist the packers in mailing out the proper documentation.

PROGRAM OPERATION

CODE: < >: Type a four character code and press <ENTER>.

DESCRIPTION: Type the description of the code to give you visual aid as to what the code stands for. This description can be up to thirty characters long including spaces.

TYPE: 1 = PART GROUPING CODE

2 = MEDIA TYPE CODE Type a "1" to represent a PART GROUP CODE or a "2" to represent a MEDIA TYPE CODE and press <ENTER>.
