

## **Parts Shipped/Ordered by Part#**

**PROGRAM NAME:** INSANAL1

**MENU OPTION TITLE:** Parts Shipped/Ordered by Part#

**MAIN MODULE:** ORDERS SHIPPED REPORTS

**HELP KEY ACTIVE:** YES

### **PROGRAM OVERVIEW**

By part number, or range of parts, this report gives you total ordered and shipped quantities, for a specific time frame. Along with the total dollars per part number, for both ordered and shipped quantities, there are also column totals of the dollar amounts.

You must select a date range to define the time frame of your report. This helps in targeting, year to year, a specific time frame to determine seasonal trends, if useful to you.

This will help you see out of stock trends as well. If you have a lot of orders taken but not shipped, this could indicate supplier problems or incorrect buy habits or bogus sales orders for whatever reason.

### **PROGRAM OPERATION**

**ENTER PART NUMBER TO SEARCH FOR (RETURN FOR ALL):** Either type a valid part number or <ENTER> through this field to see a report for all parts ordered and shipped.

**BEGINNING REPORT DATE:** Any orders processed before this date will not show on report.

**ENDING REPORT DATE:** Any orders processed after this date will not show on report.

**IS THIS CORRECT**
