Order Viewing / History

PROGRAM NAME: OEHISTVW
MENU OPTION TITLE: Order Viewing / History
MAIN MODULE: ORDER VIEWING/MAINT
HELP KEY ACTIVE: Yes

PROGRAM OVERVIEW

This program is used to view orders that have been archived from the system. These orders are still ON the computer system, they are just not considered LIVE orders. They have been removed from the live orders database and stored in another history database.

Also, this program may be run directly from the menu system, or it may be called from within other programs that may contain an <F7> Options Menu.

PROGRAM OPERATION

This program works identically to the current order viewing program "SAORVIEW". Please refer to that document for detailed discussion.
