

Standard W.O. Entry

PROGRAM NAME: REQASSY

MENU OPTION TITLE: Standard W.O. Entry

MAIN MODULE: MANUFACTURING/WORK ORDER

HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program is a quick work order processing program that converts materials programmed in the bill of materials into the finished good. It can only be used in small manufacturing systems where actual costing is not being tracked. This program will not create an inventory detail record, which is the basis of actual cost tracking. It will simply deduct the materials from each of the parts listed in the bill of materials and add to the finished quantity of the main part. Therefore, the cost will be the standard calculated cost of the assembly, which is stored in the part master file

PROGRAM OPERATION

WORK ORDER #: Press <F8>, which will assign it the next number.

PART NUMBER TO ASSEMBLY: Enter the part number of a finished good assembly that has a bill of materials.

QUAN: Enter the quantity you wish to process.

IS THE INFORMATION ABOVE CORRECT ? (Y/N)

ESC TO EXIT, RET TO CONTINUE, PgUp/PgDn/UpArrow/DnArrow TO SCROLL

ALL PARTS OK. BEGIN TRANSFER? (Y/N):
