

Zero Out Invoice Batch

PROGRAM NAME: SADELORD

MENU OPTION TITLE: Zero Out Invoice Batch

MAIN MODULE: DIST ORDER PRINTING

HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

When an order is shipped using the UPS manifest system, the order number and other information can be stored in this file for automatically printing the shipped invoices as a batch. The shipping UPS manifest program uses the data file {SPOOLORD}. If you were printing the invoices and the system crashes when only a few invoices are left to print, then you may want to individually print the remaining orders and clear out this file. Otherwise you will end up reprinting all of the invoices.

PROGRAM OPERATION

ARE THE ORDERS PRINTED THAT YOU WISH TO DELETE?

ARE YOU REALLY SURE THE ORDERS CAN BE DELETED?
